He leads the MCAT Self Prep Mentoring Team and has worked one-on-one with hundreds of students. He also has great experience in professional practice issue writer and analyst mcat and DAT exams. While studying MCAT, I spent countless hours producing thousands of flashcards. It was hard work, but I knew that MCAT needed a deep understanding of the content that succeeds. My hard work paid off, and as I learned the experiences of other top-notch students, I saw a pattern that they were all using flash cards, confirming that they really knew all the MCAT content before the exam. In my experience of coaching hundreds of pre-meds, however, I found that most of my students didn't have time to create high-quality flashcards covering every mcat concept. This motivated me to create my own Quizlet flashcard collection. This includes every concept taught by Khan Academy as well as several content review books, so you can feel confident knowing that you've learned all the content MCAT requires. This has been a very useful teaching aid for my students, many of whom have become 100. I'm sure it'll help you too. I highly recommend Andrew over any prep course – you can get personalized help and someone who really wants to see you do your best! If someone plans to take MCAT, I recommend using MCAT Self Prep; it has fantastic resources and mentors who go above and beyond you. After spending 4K+ on the MCAT testing company for my first test, I contacted MCAT with Andrew. The website/system that Andrew offers is a utopia MCAT preparation. Not only will it prepare you for MCAT but also, will change your lifestyle and how one should properly approach MCAT. During diagnostics & having FLS, my score changed to 495.510 and I witnessed a 7 point rise in the real thing. With great big flashcards that I had the opportunity to use everywhere, I got the MCAT score I wanted. THAT'S GOOD. Thank you Andrew for all the work. One of the things that really stood out to me was Andrew's emphasis on high quality note cards as well as his program affordability compared to other companies. The fall semester of my junior year was quite difficult and I found that using note cards in preparation for my classes was a very effective way for me to learn, and having that bearing really drew me to MCAT Self Prep. On Test day, I got 514 perfect results in behavioral sciences. I highly recommend MCAT Self Prep when preparation is the upper limit and very well prepared and customized for effective, high yield content. It's been my experience that using note cards is the best method of learning mcat, because most issues are looking for you to apply small pieces of memorized information in different situations. I definitely felt overprepared on Test day. You won't find a better mentor or more short yet a comprehensive set of note cards for this huge test than Andrew and his materials! As a 30-year non-traditional applicant, I had to find every topic covered by MCAT and then re-teach it myself. Andrew's course was a great way to do it. The main course is free, but I do buy notecards and a few other courses (Math, 100 equations, amino acids). All the information I learned was invaluable in my success exam and admission to medical school. I highly recommend using this resource. Everything is simple and lacking unnecessary charges. I signed up for an Advanced Pro plan at the beginning of my long learning journey. It ended up being an amazing source that I used every day. The layout of the modules made the website very user-friendly. My favorite aspect of this plan, and probably the most useful for me, were quizlet cards. They really make you think and combine concepts of different content areas together. I have recommended MCAT Self Prep to all my friends who plan to go to medical school. The Quizlet Flashcard collection is available as part of MCAT Self Prep's Advanced Pro plan for just \$99.99! Our MCAT Video Collection, which covers all MCAT topics listed in AACM.
